Good afternoon ladies and gentlemen, I'm Max Hall, one the proud co-creators of the application we bring to you today.

As a group of first years, this problem statement posed a bit of a setback as we were working with the unknown.

* Pause & change slide *

However, we needed something which strengthens the student community, by taking our education back into our own hands.

To do just that, we bring you UC-Me.

* Pause & change slide *

This app helps form study groups and hence joining like minded students while bringing them back to campus.

Now over to Zuleigha to introduce you to our team.

* Over to Zuleigha & change slide *

Thanks Max, as you all now know I'm Zuleigha another co-creator of UC-Me.

A welcome from our team of myself, Anri, Takudzwa and Max.

We have seen, or rather not seen through this first term there's a gap for something that brings the UCT community back together.

And we feel UC-Me bridges this gap.
Now back to Max to show the app!!

* Back to Max *

And this is our app UC-Me!

* Back to Zuleigha *

We have all been forced away
Behind closed doors we stay
Craving human interaction
In desperate need of a companion

* Back to Max *

No one knows from whence she came;
Covid-19, we cannot tame
But alas do not despair
For sometimes the world is fair

* Back to Zuleigha *

Yes it has lectures and tests
And assignments, unwanted guests
Before your entire world crashes
Lets help you rise out the ashes

* Back to Max *

Hello, welcome to UC-Me!
That needed kinship, we can guarantee
Unwanted guests we'll help you endure
So sign up and go explore!

* Back to Zuleigha *

And below we have our T&C's, now time for the demo!

Over to Anri to talk through what went into our app!

* Max navigate to timer part of app *

* Over to Anri *

Talk about the backend/~~guide through tickers~~

* Back to Max *   Takudzwa

Thanks Anri, I'll hand back to ~~Zuleigha~~ to tell you of our future ideas.

* Back to Zuleigha and Back to Canva *

We plan to put in place an authentication system which verifies the user to be a registered
university student. As well as more features such as chat rooms, a video chat function which
helps students meet new students through randomised match ups and a trip advisor for students
by students.

And that concludes our app so far.
